EDITORIAL EXPERTISE

MTI has a finger on the pulse of the latest developments in the machine tool industry and wider manufacturing sector. We are now the UK's only weekly publication for the machine tool market. Who wants news that's a fortnight or a month old? Our editorials include:

- Industry and company news
- Sector updates
- Technology features
- Exhibition previews
- Manufacturer focus specials
- Auction announcements

Our strengths

MTI is just a click away, regardless of reader location. The digital issue appears online every Monday, while we also send the issue direct to the inbox of around 30,000 recipients – perfect for the work from home era. Furthermore, thousands of our readers are now accessing the magazine via free apps available from the Apple and Google Play stores.

EXHIBITION ISSUES

MTI runs regular issues dedicated to leading exhibitions taking place in both established and emerging economies around the globe. Advertising in these issues ensures placement in both the digital edition, as well as special print editions that we produce for distribution at each exhibition. Current shows include:

- | | |
|----------------------------------|--------------------------------|
| • SteelFab, United Arab Emirates | • UMEX, India |
| • FITMA, Mexico | • Metalex, Vietnam |
| • Southern Manufacturing, UK | • Metalex Thailand |
| • MACH, UK | • Advanced Engineering, UK |
| • Metaltech, Malaysia | • ADIPEC, United Arab Emirates |
| • Subcon, UK | |

TECHNOLOGY FEATURES

MTI includes in depth technology features every week.

Areas include:

- CNC milling and machining Centres
- CNC lathes and turning Centres
- Cutting tools
- Grinding and surface finishing
- Metrology
- Profiling and punching
- Bending and forming
- Sawing and stockholding
- Work holding and tool holding
- EDM
- CNC and CAM
- Presses and coil handling

GREAT OPPORTUNITIES WITH MTI's INTERNATIONAL EXHIBITION ISSUES

Tap into buoyant and emerging markets by advertising in MTI's regular international show issues. We exhibit or have a presence at each event, handing out printed copies to visitors. This strategy ensures that the stock of advertisers gets in front of active buyers, most of whom are attending the show with the specific intention of purchasing or enquiring about machine tools.

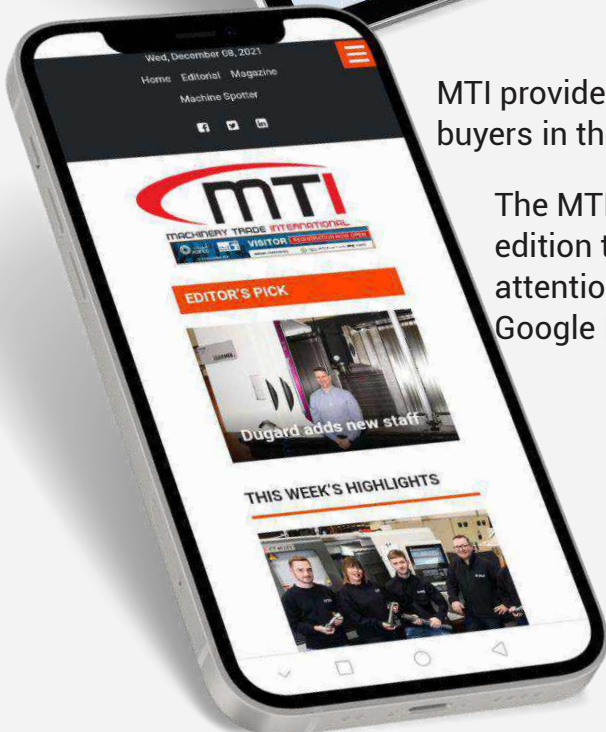

A WORLD OF DIFFERENCE WITH MTI

MTI provides a 'one stop' marketplace for the selling and sourcing of machine tools. Our magazine reaches major decision makers and machinery buyers in the UK and across the globe, including highly active regions such as the Middle East, Eastern Europe, Southeast Asia and the Far East.

The MTI digital magazine helps today's generation of time poor engineers get news and information direct to their devices. We send our digital edition to thousands of opt in recipients every week. Readers can scroll and swipe at ease, quickly viewing anything that captures their attention and using interactive links to discover more. Thousands of people have also been downloading the MTI app from the Apple and Google Play stores. Of course, with a digital magazine, unlike a print version, it's possible to track how many people have opened it.

MTI prints its magazine for distribution at exhibitions – typically around 5000 copies for each show. With our global exhibition circuit comprising 18 20 exhibitions a year, this is close to two printed magazines each month, which more than matches any other printed magazine in the market.

The digital and print editions of MTI magazine are just two of our routes to market. We also have an established website with a high hit rate, backed up by well supported Twitter, LinkedIn, Facebook and YouTube social media channels. MTI had nearly 3000 followers on Twitter at the time of publishing this media pack, for example. The combination of digital magazine, print magazine, website and social media channels makes MTI an essential resource for the machine tool community. As a further service, we can also offer bespoke e mail/digital brochure blasts to our database.
